Dear Mr Spencer,

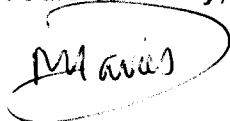

Proposed Parkerville and Stoneville townsites

We received a letter from your department on the 15th August last year stating that the Water Corporation was in discussion with the developers of both these sites as to the possible methods of wastewater treatment. This issue is of great concern to a large number of Hills residents and I have been asked to enquire as to progress to date and to ask the following questions on their behalf:-

- 1) What conclusions have been reached as to methods of treatment?
- 2) Has consideration been given to pumping sewage 'down the hill' for treatment and if so by what route?
- 3) What size pipe would be required for such a proposal and what visual impact would it have?
- 4) Is the Water Corporation seeking a treatment solution that will be suitable for the additional townsites proposed in the North Eastern Hills Settlement Pattern Plan, or will the method of treatment be determined on a case by case basis?

I look forward to receiving your response in the near future.

Yours sincerely,

Mike Davies
