13 December 2006

Dear Mr Davies

Further to your letter of the 23 November 2006 to Mr Peter Spencer in which you enquire as to progress by the Corporation of a wastewater scheme to the Stoneville/Parkerville developments, we can advise as follows.

1. The developers of the Stoneville residential area have been liaising with the Corporation on options for a local wastewater treatment for the area. A draft report has been lodged and further work has been requested of the developer's consultants. There are several options and locations being considered with the more likely being a plant which produces treated effluent that is suitable for reuse back to POS and or tree lots within the developments. The developers of the Parkerville area have also been in discussions with the Corporation but have yet to lodge a proposal for assessment.
2. Consideration of connection to the Midland scheme has been assessed and is not considered to be a viable option due to limitations of availability of a suitable route and the limited spare capacity of the existing infrastructure in Midland.
3. No pipe sizing has been determined but it would have been located underground with no visual impact.
4. The Corporation remains committed to local treatment and reuse wherever possible in the hills areas as outlined in our previous correspondence. The treatment plant will be initially designed to cater for the Stoneville Parkerville developments but will be designed such that it will be able to be expanded should other townsites as depicted in the North Eastern Hills Settlement Pattern Plan eventuate. Connection of these townsites will be assessed on a case by case basis.

I trust that the preceding information provides you with sufficient detail for your meeting. Should you require any further information pertaining to the above matters, please do not hesitate to contact Mr Russell Nelson at the John Tonkin Water Centre, 629 Newcastle Street, Leederville, on telephone (08) 9420 3361.

Yours faithfully,

Russell Nelson
Development Services
